

PREMIXER/PROPORTIONER

■ PRODUCT DESCRIPTION

The ASHBURN PREMIXER/PROPORTIONER is designed to premix your Ashburn coolant concentrate with water at the correct proportion. The unit threads into the 2" or 3/4" bung of the concentrate drum and a water hose is connected to it. When the water is turned on, the coolant concentrate is siphoned from the drum and mixed with the water at a predetermined ratio. The ratio is set by the metering tip selected.

- Simple and Accurate Premixing Method
- Easily Changeable Metering Tips
- No Moving Parts = No Maintenance
