

REFRACTOMETER

- Reduces Foul Odors
- Prolongs Coolant Life
- Prevents Smoke
- Better Overall Product Performance
- Reduces Overall Costs of Production

■ PRODUCT DESCRIPTION

The ASHBURN REFRACTOMETER is an industrial fluids testing device that will quickly and accurately measure the concentrate to water ratio of metalworking coolants, parts cleaners, chromating solutions and many other types of aqueous based solutions and emulsions.

Maintaining the proper dilution ratio is critical in achieving maximum results from your water soluble concentrate. Incorrect concentrations of metalworking coolants lead to premature tool failure, rust, tacky residues, skin irritation, premature spoilage, and many other problems.
