

The background of the entire page is a high-contrast, close-up photograph of a CNC machine in operation. A metal cutting tool is shown in the process of machining a metal workpiece. A large, dense spray of white coolant is being directed at the cutting point, creating a misty atmosphere. The machine's components are dark and metallic, with some yellow safety cables visible on the left side. The overall scene conveys a sense of industrial precision and manufacturing.

# Fluids and Facilities. **Protected.**

Protecting your production  
through advanced fluid and  
equipment maintenance  
programs.

# Protect Metalworking Production.

Fluid Service Technologies is the proven leader in protecting your production by keeping fluids, machinery and work environments clean and functioning properly.

## ABOUT FST.

Fluid Service Technologies (FST) is an industrial fluid maintenance company specializing in driving better fluid performance, operator efficiencies, facility safety and environmental compliance.

Our customers protect their productivity through lower waste and disposal rates, custom fluid maintenance and machine tool cleaning programs, fluid performance consulting and technology-based fluid performance insights.

## WHY FST?

**Maintain an operational edge:** Increase tool and sump life, increase operator efficiency, minimize downtime, get the job done faster and more predictably.

**Protect your bottom line:** Reduce or eliminate production-fluid related problems that hinder your production schedules or lower tool and equipment life.

**Improve operator satisfaction and loyalty:** Cleaner machines and work environments promote operator productivity and satisfaction.

**Intelligent production:** Better production decisions based on information, analytics and insight designed to drive production performance.

## CARE360™ Solutions

The industry's only 360° solution that protects your production and environment through innovative services and partnership.

Fluid Services Technologies brings a full range of services to increase production capability, keep work spaces and environments clean, lower operating cost and make better production decisions.

**FST GETS YOU BEYOND FLUID AND FACILITY PROBLEMS THAT NEGATIVELY IMPACT PRODUCTION CAPABILITY, EFFICIENCY AND SUCCESS.**
