

Protecting Fluid Performance.

Protecting your production
through maintenance and
restoration of fluids, equipment
cleanliness and facilities

Poor fluid maintenance negatively impacts the bottom line.

Metalworking fluids are the lifeblood of tooling effectiveness and lifespan. Ensure you protect the utility, effectiveness and quality of your metalworking fluids as a means to:

- Maintain or improve machined product quality
- Extend machine tool life
- Reduce or eliminate biological contamination
- Improve operator safety and satisfaction
- Lower overall production cost

Operational protection through custom fluid maintenance programs designed to meet your unique needs.

CUSTOM FLUID MAINTENANCE PROGRAMS

- Coolant Evaluation and Laboratory Analysis
- Sump Out and Recharge Options
- Optional Coolant and Additive Products
- Mechanical & Chemical Coolant Treatments
- Scheduled Coolant & Sump Filtration

ON-SITE FLUID AUDITS & CONSULTING

- Proper Coolant Application
- Maintenance Processes & Procedures
- Coolant Equipment & Recycling Performance
- Cost Analysis & Recommendations
- Equipment & Integration Recommendations

FST UNIVERSITY

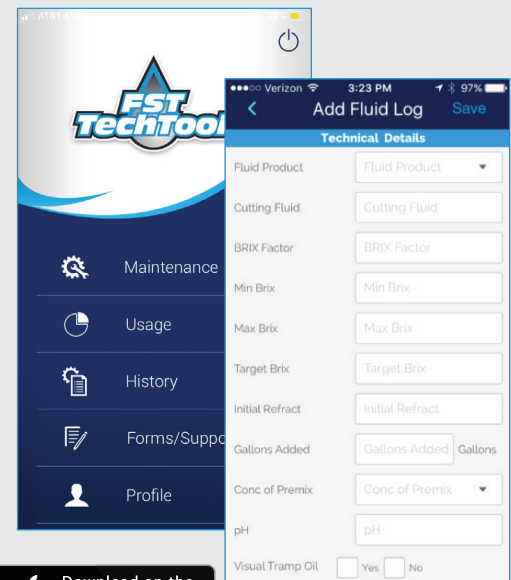

- Fluid Maintenance Training
- Coolant Technician Certification Training
- Customized Fluid Maintenance Training

Metalworking Fluid Utility and Performance Protection.

Reduce or eliminate production-fluid related problems that hinder your production schedules or lower tool and equipment life.

Unique to the industry and only from FST, protect your operational decisions and outcomes with insight into metalworking fluid performance and optimization.

PRODUCTION FLUIDS DON'T TAKE CARE OF THEMSELVES. OPERATORS DON'T TAKE CARE OF FLUIDS LIKE THEY SHOULD. WHAT ARE YOU GOING TO DO?
