

Unique to the industry and only from FST, protect your operational decisions and outcomes with insight into metalworking fluid performance and optimization.

TechTool is the superior fluid tech automation program for field technicians to monitor fluids using an iPad or iPhone. This maintenance tool provides critical fluid monitoring that helps enhance fluid performance and extend fluid life, resulting in major cost savings.

FLUID SERVICE TECHNOLOGIES TAKES YOU BEYOND THE OBVIOUS TO SOLVE COMPLEX CHALLENGES TO OPERATIONAL SUCCESS.

Protecting your production through maintenance and restoration of metalworking fluids, equipment cleanliness and workspace safety.

Fluid Service

GOING BEYOND.

CARE 360™ SOLUTIONS

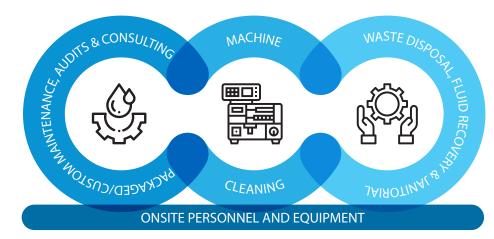

Production Peace of Mind.

Companies seeking to protect their production, operational effectiveness, machine tools, equipment and workspaces partner with Fluid Service Technologies.

Our customers benefit from 360° of operational and production protection.

You can too.

A COMPLETE 360° OF VALUE.

WHY FST?

Maintain an operational edge: Increase tool and sump life, increase operator efficiency, minimize downtime, get the job done faster and more predictably.

Protect your bottom line: Reduce or eliminate productionfluid related problems that hinder your production schedules or lower tool and equipment life.

Improve operator satisfaction and loyalty: Cleaner machines and work environments promote operator productivity and satisfaction.

Intelligent production: Better production decisions based on information, analytics and insight designed to drive production performance.

Fluid Maintenance Programs	On-Site Audit & Consulting	FST University	Level I Program	Level II Program	Level III Program	Level IV Program	Industrial & Janitorial	Liquid/Solid Waste Disposal	Other Services
Coolant Evaluation	Proper Coolant Application	Fluid Maintenance Training	Remove Coolant from Sump	All of Level I Program Tasks	All of Level I and II Program Tasks	All of Level I, II and III Program Tasks	Floor Maintenance	Coolants (soluble, semi & synthetic)	Chip Processing (Pucking & Squeezing)
Sump Out and Recharge	Maintenance Process and Procedures	Coolant Technician Certifications	Provide Minimal Rinse within the Machine	Clean all coolant contact areas	External Visual Machine Cleaning	Detailed External Clean and Machine Prep	Production Area Cleaning	Oils and Oily Water	Chip Bin (removal/replacement)
Coolant Treatment	Coolant Performance	Customized Fluid Maintenance Training	Recharge Coolant to Desired Concentration	Comprehensive Rinse Within Machine(s)		Professional, Like-new Machine Painting	Move-in/out Cleanup	Cleaners (water-based/solvent)	Production Area Cleaning
Scheduled Coolant & Sump Filtration	Cost Analysis & Recommendations			Apply Disinfectants, Rust & Bio Inhibitors			General Shop Cleaning	Filters and Floor Absorbents	Material Recycling
	Equipment Recommendations						Pressure Washing	Hydro-static Testing Fluids	Chemical Inventory Control
							Machine Housekeeping	Solid and Hazardous Waste	Waste Water Treatment
									Forklift

Operational and Production **Protection.**

The industry's only 360° solution that protects your production and environment through innovative services and partnership.

Fluid Service Technologies CARE **360** Solutions brings peace of mind through: fluid maintenance and consulting, machine tool cleaning, waste minimization and recycling, compliance-oriented disposal and industrial facility upkeep.

ABOUT FST

FST leads the industry in delivering operational protection by specializing in maintenance, cleaning and industrial services that keep production rates and operator satisfaction rates high.

We're the source that business and operational leaders rely on to keep fluids optimally performing, to clean and inspect machinery, to keep facilities clean and free from hazards and to properly dispose of waste.
