Nonfood Compounds
Program Listed H1
Registration #154579

PRODUCT DESCRIPTION

PUMP SPRAY LUBRICANT is an environmentally safe, biodegradable cutting lubricant that provides excellent cooling and lubrication in metal cutting operations. It is excellent for use in operations on tough metals such as tool steels and stainless steel as well as on softer metals.

This product will not stain or affect the properties of metals including soft metals such as aluminum. It is a very safe product for both the operator and the environment. It is supplied in a convenient pump spray bottle for easy application.

APPLICATION

For use on all ferrous and non-ferrous materials. Use for drilling, tapping, sawing, turning, milling, reaming and other machining applications. Apply to the tool before the cutting operation. Use only enough to coat the tool.
