

# Protect Your Facilities, People and Environments with the MicroCloud™ Lite Portable Sanitizing System

**Fluid Service**  
**TECHNOLOGIES**

GOING BEYOND.

MicroCloud™ LITE is the industry's best solution for quickly and effectively sanitizing any surface or area. This portable, handheld, ultra-low volume (ULV) unit is designed for convenient disinfecting, allowing you to spray target surfaces more thoroughly than other cleaning practices. The 33' spray range helps you reach areas that traditional cleaning methods miss. The controlled droplet size minimizes risk of condensation, allowing for quick evaporation: no additional wipe-down required. Ideal for the consistent sanitization of vehicles, classrooms, offices, airplanes, restaurants, salons, rental properties and any other area.

**PORTABLE, COMPACT DESIGN • 1 FULL TANK COVERS UP TO 10,000 SQ. FT.  
QUICK EVAPORATION (NO WIPE DOWN REQUIRED) • 33 FT. SPRAY RANGE**

## MICROCLOUD™ LITE ADVANTAGES:

- Easy setup
- Portable, compact design
- Minimizes risk of condensation
- 1 full tank of EPA/CDC recommended Non-Acid Disinfectant chemical covers up to 10,000 sq. ft.
- Adjustable flow rate to fit your application and deliver disinfectants to complex areas
- No long aeration processes (no wipe down required)
- Anti-corrosion material nozzle
- Quick sanitization allows rapid turnaround
- Adjustable micron size - fine output flow adjustment or adjustable according to actual needs.
- Time and labor saving - set up in smaller rooms for full area sanitizing

## SPECIFICATIONS:

- Reservoir size: 1.2 gal (4.5 L)
- Spray range up to 33'
- Droplet size: Adjustable range between 10-150µm (Microns)
- 6 lbs (empty)
- 14 lbs (with disinfectant)
- 60° adjustable angle
- Voltage: 110V AC
- 16.5 ft cord length

## PART#: S-FST-MICROLT

Unit comes with one gallon of EPA recommended Non-Acid Disinfectant chemical.
