FLUID MAINTENANCE.

360° OF METAL WORKING FLUID MAINTENANCE.

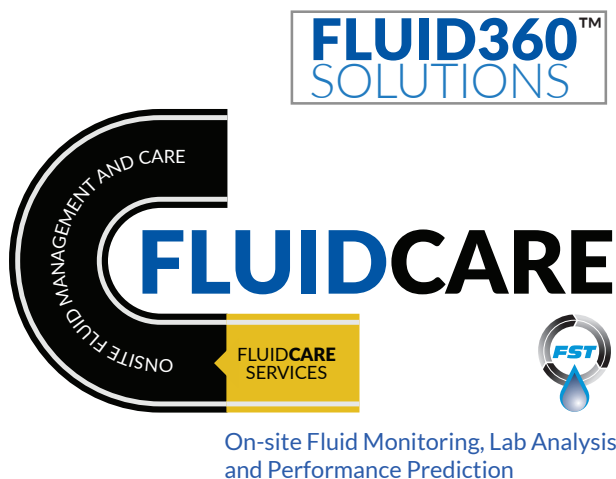

Fluids are integral to your ability to create quality, precision product for your customer in a timely and cost effective manner. Dirty fluids can lead to machine failure, unplanned downtime and production interruption.

Don't let this happen to you. Keep fluids always performing at their best. And save money at the same time!

KEEP YOUR PRODUCTION ENVIRONMENT OPERATING SMOOTHLY.

Ashburn Chemical Technologies offers unique, on-site service to protect your production from unnecessary downtime, poor finish, and reduced tool life due to coolant contamination, chip interference, and biological contaminant hazards.

Operational protection through custom fluid maintenance programs designed to meet your unique needs.

CUSTOM FLUID MAINTENANCE PROGRAMS

- Coolant Evaluation and Laboratory Analysis
- Sump Out and Recharge Options
- Optional Coolant and Additive Products
- Mechanical & Chemical Coolant Treatments
- Scheduled Coolant & Sump Filtration

ON-SITE FLUID AUDITS & CONSULTING

- Proper Coolant Application
- Maintenance Processes & Procedures
- Coolant Equipment & Recycling Performance
- Cost Analysis & Recommendations
- Equipment & Integration Recommendations

INDUSTRY LEADING FLUID CONSULTING

- Fluid Maintenance Training
- Coolant Technician Certification Training
- Customized Fluid Maintenance Training
- Equipment & Integration Recommendations

360° of Fluid Protection that Stops Problems Before They Occur.

PRODUCTION FLUIDS DON'T TAKE CARE OF THEMSELVES. OPERATORS DON'T TAKE CARE OF FLUIDS LIKE THEY SHOULD. WHAT ARE YOU GOING TO DO?
