FOR IMMEDIATE RELEASE

FST Introduces the MicroCloud™ LITE sanitization kit.

HOUSTON, TX. – Fluid Service Technologies (FST), the leading industrial fluid maintenance company specializing in custom fluid maintenance programs, equipment and services launches MicroCloud™ LITE, a compact and easy-to-use solution for disinfecting offices, schools, warehouses and vehicles, including cars, buses, trains and airplanes.

In a COVID-19 world, sanitizing facilities, offices and vehicles clean and safe for people is important. FST leads in the industry by delivering operational protection through specialized maintenance, cleaning and industrial services that keeps production rates and operator satisfaction high, while sanitizing workplaces to reduce the probability of infection.

Wherever people are or might go, MicroCloud™ can reduce the possibility of infection. MicroCloud™ LITE is a portable, handheld ultra-low-volume (ULV) system designed for convenient disinfecting. MicroCloud™ LITE allows you to disinfect target surface more quickly and thoroughly than other disinfecting methods. With FST's MicroCloud™ LITE, you'll have an edge in keeping workplaces and workers safe.

"We are excited to be able to offer the MicroCloud™ LITE product to our customers to ensure they are able to clean and protect any area," said Kelly King, Vice President of Operations. "It's a cost-effective, easy-to-use solution to ensure everyone's safety."

About Fluid Service Technologies

Our goal is to reduce the amount of fluid waste and disposal generated by a manufacturer. We do this by conducting a thorough shop evaluation to identify the strengths and weaknesses of the current fluid maintenance procedures including recycling and waste minimization equipment, and then develop a custom fluid maintenance program based on our findings. All FST custom fluid maintenance programs begin with a guaranteed cost savings solution.

About Ashburn Chemical Technologies

Ashburn Chemical brings advanced fluid products and services to industrial manufacturing companies to cost-effectively protect operational production, product quality, tooling, machinery, the operator environment, and your satisfaction. In addition to manufacturing quality chemicals, Ashburn provides custom-designed fluid maintenance programs.
